**Reference: Napier Wind Project: *Addendum to the Natural Heritage Assessment and Environmental Impact Study***

Subsequent to the finalization and confirmation of the Natural Heritage Assessment and Environmental Impact Study (NHA/EIS) for the Napier Wind Project, wpd has identified the need to make modifications to the Project layout as it was presented in the NHA/EIS Report. Discussions with Hydro One resulted in the elimination of the feeder line that was originally included as part of the "project location" for the Napier Wind Project. As a result of these discussions, the feeder line has been removed from the Project (the Project will connect directly into the Grid at the switching station). The current Project Location is shown in Figure 1 (attached).

The change is restricted to an elimination of the feeder line; there is no change to the wind project components (turbine base, construction areas or access road locations). A summary of changes to the final NHA/EIS (January 2012) as a result of the proposed project modification include:

- Deletion of Feature 2 from the records review, site investigation and evaluation of significance.
- Deletion of the Environmental Impact Study (Section 6.0).

These changes have been incorporated into other relevant REA reports (i.e. Construction Plan Report and Design and Operations Report).

Respectfully,  
**STANTEC CONSULTING LTD.**

### Legend

- 120m Zone of Investigation
- Original Project Location: Deletion
- Turbine Location
- Switching Station
- Access Road
- Collector Line
- Road
- Access Road
- Crane Pad
- Laydown Area

#### Significant Natural Features

- 1 Woodland
- Wetland
- Generalized Significant Wildlife Habitat

- ### Notes
1. Coordinate System: NAD 1983 UTM Zone 17N
  2. Base features produced under license with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2011.
